

## PORTABLE MUD MIXING FACILITIES

**Choose from mud-mixing plants in capacities of 50, 100, 200 or 500 barrels. Combine them in any configuration, with 500-barrel storage tanks. The result is a complete, portable mixing and storage system.**

- Mix LCM, high-viscosity and squeeze pills
- Pre-hydrate gel and pre-mix mud chemicals
- Mix and pump sweeps
- Increase your rig's fluid mixing capacity
- Mix workover and completion fluids

### MIXING PLANT FEATURES:

- Portability
- Unique stairway design for optimum safety
- A high-capacity mixing hopper
- A totally enclosed tank
- An interior lined with a chemical-resistant epoxy coating
- Centrifugal mixing pumps equipped with mechanical seals.
- Diesel power, with a 225-horsepower John Deere motor
- Round design for strength and quick cleanout

### STORAGE TANK FEATURES:

- Three 24-inch confined-space entry hatches
- Internal fluid level gauge
- Internal gun line equipped with six mud-gun nozzles
- Diesel- or electric-powered centrifugal pumps available
